

PINNU VARSHINI

Amaravathi, Andhra Pradesh — 📞 +91-9182888596 — ✉ varshinipinnu8@gmail.com —  [linkedin.com](#) —  [github.com](#)

PROFESSIONAL SUMMARY

Integrated M.Tech student in Software Engineering with strong foundation in Java, Python, Data Structures, DBMS, and Operating Systems. Experience in developing web applications and automation projects using MySQL, OOPS, and REST APIs. Looking for an entry-level Software Engineer role to build scalable and efficient software solutions.

PRACTICAL EXPOSURE

Cloud Engineering & DevOps Intern — Datavalley.ai (View Certificate) May 2024 – July 2024

- Worked with AWS cloud infrastructure and implemented deployment pipelines.
- Assisted in building CI/CD workflows and containerized deployments using Docker.
- Managed application resources using AWS services such as S3, IAM, and EC2.
- Supported cloud monitoring, automation, and scalable analytics workflows.

EDUCATION

Vellore Institute of Technology, Amaravati 2022 – 2027

M.Tech Integrated in Software Engineering ; CGPA: 8.74

Narayana Junior College, Tirupathi 2020 – 2022

Intermediate, MPC ; Percentage: 92.60%

SKILLS

Languages:	Java, Python
Technologies:	JavaScript, HTML, CSS, PHP, React.js, Node.js
Database:	MySQL, MongoDB
Tools:	Git, GitHub, Docker, AWS, REST APIs
Concepts:	Data Structures, DBMS, OS, OOPS, CI/CD
Soft Skills:	Problem-Solving, Teamwork, Communication, Adaptability

PROJECTS

Virtual Assistant — Python, NLP

- Designed and developed a Python-based voice assistant using basic Natural Language Processing.
- Integrated speech-to-text and text-to-speech APIs for real-time user interaction.
- Implemented error handling, input validation, and command recognition to improve reliability.

Cowork Space — HTML, CSS, JavaScript, PHP, MySQL

- Developed a web-based workspace management system that integrates AB1, AB2 and CB blocks.
- Built a real-time room monitoring module to track classroom and lab availability.
- Designed MySQL database for storing and retrieving room allocation data.

Hospital Equipment Tracking System — React.js, Node.js, MongoDB

- Developed a full-stack hospital equipment management system using React.js and Node.js.
- real-time equipment tracking and assignment modules built for dashboard management.
- Designed database for storing equipment and assignment data.

Credit Card Fraud Detection — Python, Numpy, Pandas, Matplotlib

- Developed a credit card fraud detection model using Random Forest on highly imbalanced transaction data.
- Handled class imbalance using SMOTE and preprocessing techniques to improve Recall and F1-score.
- Evaluated models using confusion matrix, Precision, Recall, and F1-score, selecting the best-performing model.
